LONELY HEARTS

MCCONNEL PA93 – LOOKING TO GET HITCHED (to a tractor)

I have a long reach and a big head, had a lot of experience working with various stylists.

I carry my own lubrication with me, and enjoy getting into ditches!! Looking forward to trimming some more bushes.

£4500

SPECIAL PURCHASE

Get ready for the next cold snap, keep your cattle growing by feeding via a Portequip Cattle Feed Trailer.

25' x 6' with 48 spaces - Solid Floor

Special Price £2,750 + VAT

STUART'S NEWS

Rob achieves LTA4!!

CONGRATULATIONS to Rob Griffiths in gaining his LTA4 accreditation. Rob is a key member of our Nantwich service team and was one of the first six John Deere service technicians in the UK to achieve LTA4 Master Technician accreditation who were presented with their certificates and registration cards on the John Deere stand at the LAMMA 2010 show at Newark in January.

Introduced as the top tier of the industry's Landbased Technician Accreditation (LTA) scheme, the Master Technician designation recognises individuals as having a proven and professionally assessed track record as the very best technicians, with the highest level of diagnostic skills and specialist product knowledge.

"By employing an LTA accredited technician, or choosing a dealer with LTA registered technicians, customers can be secure in the knowledge that their equipment is being serviced by the best in the industry," says Christopher Whetnall, chief executive of IAgRE. "With the ever increasing complexity and sophistication of agricultural machinery, it is vital to know that your equipment will be maintained by highly skilled professionals."

To achieve the full Master Technician qualification after being accredited at LTA3 level, individuals have to undergo additional training and assessment of their abilities in advanced diagnostic testing and product knowledge, as well as their customer and technical mentoring skills.

We are really proud of Rob's achievement and will continue to support his future training to broaden his portfolio of skill even further.

Our participation in the LTA scheme is part of the commitment to our focus on after sales excellence.

SERVICE OFFERS

COMBINES AND SELF PROPELLED FORAGE HARVESTERS

The schedule is filling up, so to take advantage of the best parts prices available, we encourage you to make contact with the service department to arrange an out of season assessment. Not only is this an opportunity to have an out of season service carried out on the best possible terms but also help to avoid the cost and downtime of a potential breakdown during the season.

For more information on John Deere Maintenance please call in store or visit our websites www.cornthwaiteag.co.uk and www.ag-mac.co.uk.

PARTS

JOHN DEERE LUBRICANTS AND COOLANTS

Products specifically developed for use with John Deere equipment.

Your agricultural equipment works hard in tough, demanding conditions in all kinds of harsh weather – the demands placed on machinery are severe. That's why it pays to look after your machinery with the best possible lubricants. Only John Deere lubricants have been developed to ensure power packed performance and long lasting protection in your equipment.

PLUS-50 ENGINE OIL

Unique state of the art oil designed to extend oil drain intervals, ensure a longer engine life and provide improved performance and protection

- Reduced maintenance costs
- Cleaner running engine with significantly reduced wear
- Greater thermal stability and resistance to corrosion
- Easier cold starting

HY-GARD HYDRAULIC AND TRANSMISSION OIL

A sophisticated Universal Tractor Transmission (UTTO) that provides smooth operation under a wide range of operating conditions. Applications include transmissions and differential units with oil immersed "wet" brakes, gear boxes and hydraulic brakes and hydraulic system.

- Excels in controlling moisture
- Resists oxidation and deposit formation due to heat
- Permits noise-free and smooth operation of oil immersed brakes for better productivity, longer brake pad life and less chatter vibration
- Reduces final drive wear due to anti-wear additives

Please call us for more information and prices on the full range of quality John Deere lubricants and coolants or visit our websites www.cornthwaiteag.co.uk and www.ag-mac.co.uk

PARTS

JOHN DEERE FILTERS

A teaspoon of dust is enough to generate engine wear. A handful is enough to destroy your engine.

Clean air is essential to keep your engine running smoothly and efficiently. In fact, inadequate air filtration can cause more harm to your engine than poor lubricant filtration. Ineffective filtration can cause serious wear to the engine and its components...leading to low engine power, excessive fuel consumption (an increase of up to 5%) and ultimately, expensive repairs.

Genuine John Deere air filters are designed to maximise filtration, for reducing down time and maintenance costs and increasing the life and performance of your machine.

For more information on all John Deere filters please call in store or visit our websites www.cornthwaiteag.co.uk and www.ag-mac.co.uk.

ISLE OF MAN NEWS

This month we have a new RECO PR2000 Straw chopper/bale feeder on the Isle of Man as a demonstration unit. Please contact Dusty, Eddie or Matty to arrange a demonstration of this very popular machine.

Dusty (Andrew Hodgkinson) is pictured here on his trip over to the Island last month. He makes frequent visits to the island, on behalf of Agricultural Machinery (Nantwich) to support Eddie, Matty and Ayre Motors. Due to popular demand and frequent invitation, Dusty will be planning more demonstrations for the coming months.

Please contact any member of the IOM team with any sales/ service and parts enquiries.

POWERGARD MAINTENANCE

RELIABILITY YOU CAN'T AFFORD TO BE WITHOUT – ELIMINATE DOWN-TIME PROBLEMS WITH UP-TIME SOLUTIONS

As a farmer you have no power over the weather, unexpected mishaps or market fluctuations. But fortunately, you can control the condition and repair of your equipment.

How? By investing in PowerGard - John Deere's flexible maintenance options. Each is designed to help you budget your operating costs – while making "uptime farming" a reality.

Why? Regular maintenance is vital in preventing costly downtime and ensuring reliability and optimum performance. We can tailor a plan to your specific requirement.

Easy to afford: The payment method is negotiable. Depending on what is most convenient and affordable; you can:

- Pay for the entire contract in advance
- Pay in regular instalments
- Pay for services as they are performed

For more information please contact Kevan Bretherton at Bispham Green or Chris Jacques at Nantwich

USED MACHINERY BROCHURE

We have updated our **USED MACHINERY BROCHURE** to reflect our current used stock. It gives descriptions and prices with pictures. We display all our used machines on our websites (www.cornthwaiteag.co.uk and www.ag-mac.co.uk) but realise some people do not have access to the internet or indeed prefer to browse a brochure rather than a website.

If you would like to receive a copy, please email clairec@cornthwaiteag.co.uk or ring 01704 822343 with your name and address and we will make sure you receive one each time it is updated.
