LONELY HEARTS!

'Northern Irish youngster like to be on top of things'

I am often described, as a simple machine. But a great job I make, you'll know where I've been. My last home was on, a good horsey farm. Treated well by the owner, so no need for alarm. He just moved me on, for a bigger machine. Come and check me out, I need to be seen. My shaft is greased up, strapped to me it is. I come with protection, and a great pair of skids.

Fleming 6' topper, £575 + vat.

SPECIAL PURCHASE

Trailed Spearhead 460 rotary bat wing mowers – In Stock Now

Three rotors and nine boron steel blades cutting 4.6 metres at high speeds gets you over the ground in no time.

Each of these blades has a 'high-lift' tail that creates suction to lift virtually any material. This gives you excellent performance even when cutting in long stubbles or dense set-aside. You are assured a clean cut even in the heaviest growths.

- 161hp splitter gearbox and 111hp rotor gearbox with 2 year guarantee
- Special design of slip clutch provides continuous protection against overload
- Wide angle constant velocity joints on pto shaft for continuous cutting
- Hydraulically controlled parallel linkage for even cutting height
- Puncture resistant pneumatic tyres on rubber suspension for high speed transport
- Floating wings to give even cutting on undulating ground

£14,500 + VAT

STUART'S NEWS

JOHN DEERE AND KUHN AGREE ON STRATEGIC CO-OPERATION FOR LARGE SQUARE BALERS

It has just been announced that Kuhn will manufacture John Deere branded large square balers. This will enable us as dealers to re-engage in this market segment and enable us to offer customers a large square baler.

The announcement which was made on 18th May calls for Kuhn to manufacture John Deere branded balers in Europe, CIS, North Africa and the Middle East. John Deere will acquire an intellectual property license from Kuhn, so John Deere can use the large square baler design worldwide and adapt it to customer requirements in other markets.

For up to date information on the specifications, availability and pricing of these new products – please contact any member of our sales team.

JOHN DEERE PRODUCT LAUNCH – LISBON, PORTUGAL

At the time of writing we are on the eve of leaving for sunny Portugal for the global launch of the new John Deere 7R and 6R tractors. The new innovative products will be phased into production over the coming months and will all be fitted with the new Tier4 compliant engines.

Follow us on Twitter for 'hot off the press' updates on the new products, or call your local rep for all the info.

PARTS OFFERS AND INFORMATION

As part of our ongoing efforts to better serve our customers, it is our intention to deliver regular parts and service offers, new product news and other important information directly to your computer via e-mail. To do this we will require your e-mail address, so to take advantage of any future offers please e-mail parts@cornthwaiteag.co.uk or text your e-mail address to 07702 201388 we will then enter the addresses into one distribution list. This information will not be distributed to 3rd parties.

Only customers enrolled into the system will be eligible for future e-mail offers.

SHOW DATES

As well as the shows on the Isle of Man, this year we will be attending the Nantwich show on the 27th July, the Flint and Denbigh show on the 18th August and of course the Cheshire Ploughing Match on the 28th September. We'd love to see you there.

ISLE OF MAN NEWS

Dusty, Eddie and Matty have been joined over the last month by Chris Jacques (Nantwich, After Sales Team) and Jason (Manitou UK, Service Department) as we continue to increase our level of support to our customers on the Isle of Man. We hope this is a sign of our continuing strengthening presence on the Island.

Pictured here is just one of the latest editions to the Isle of Man (and the first Vaderstad seed drill on the Island).

Also pictured here is last weeks trailer full of John Deere Round balers and mowers getting ready to leave our Bispham Green depot in time for first cut silage. Please keep in touch with Dusty and the team ref shipping

equipment and spares as very often we can offer great rates when we fill up every inch of the trailers!

This year we will be exhibiting at both the Southern Agricultural Show on the 30th and 31st of July and the Royal Manx (Northern) Agricultural Show on the 12th and 13th of August. As with previous years, we always bring to the Island a wide range of new and demonstration equipment to display at the shows.

Please contact Dusty, Eddie or Matty with any specific requests for Demo Tractors / machines because if we don't know we can't bring one!

Dusty 07712 085988

Eddie 07624 493319

Matty 07624 496608

McMILLAN CANCER SUPPORT CHARITY

As many of you will be aware Mike Kilbane retired just before Christmas and we hosted a retirement party for him in February. Mike asked us to share with you that from donations on the night and shortly after, he raised £3,430.00 for McMillan Cancer Support Charity.

A presentation has been made to them and they will ensure that all the money is used locally. On behalf of Mike, Doreen and his family we would like to thank everyone who contributed to this worthy cause.

PARTS

The diesel fuel most widely available for farm use in the UK and Ireland is manufactured to BS 2869:2010. The Cetane rating is usually around 46. Adding Stanadyne Performance Formula fuel conditioner improves the Cetane rating to 51, helping to recover fuel economy.

Just three weeks of mowing grass could mean a fuel saving equivalent to a whole tank of fuel on this 7930.

As well as saving money on fuel, the conditioner helps to protect high precision fuel injection components and reduce the chance of downtime.

Part No.	Pack Size	Litres of Fuel Treated
MC32409F	.47L	235L
MC38566F	1.9L	950L
MC29410F	19L	9,500L

Assumptions: - 7930 fuel tank capacity is 392 litres. Assume this is used completely during a 12 hour day. The Stanadyne Performance Formula fuel conditioner helps to recover 8% fuel economy, but adds 3% to the cost of the fuel (based on using 19 litre pack size, treatment rate of 1:500)

SERVICE

“Thank goodness my brakes were serviced.....Stop in time, every time.”

According to the HSE “there’s an industry-wide problem of under-braked trailed equipment”. From a recent survey most farm trailers tested failed to meet basic safety requirements and fell far short of the required efficiency levels. Of the trailers tested, both with hydraulic and air systems, many took longer to stop than they should and in some cases suffered complete loss of control.

Our service department has the expertise and specialist Brake-safe™ meter to test your trailer brakes.

Using this new test equipment, braking efficiency can be measured and allow you for the first time to satisfy yourselves of your braking capabilities and may prevent long term costly brake repairs.

For further information please visit our website and look at the “look behind you” brochure in service publications. This publication was initiated in 2009 by all of the main tractor manufacturers, the Department for Transport, the HSE and in association with the AEA in an effort to minimise the extent of brake problems.

Stay legal, Stay Safe – please call your service department and book you brake test now.

AIR CONDITIONING PARTS AND SERVICE

Many machines at this time of year show faults with their air-conditioning. Some of these can just be down to your recirculation filters requiring replacement but a system check or service is always worth considering. Most machines eventually attract moisture into the system depleting its performance.

So if your air-conditioning is lacking performance – give your service department a call to discuss your options.

This applies to any make or model with air-conditioning.
