AUTUMN 2011 PARTS AND SERVICE OFFERS AND INFORMATION

Filter Offer

Clean air is essential to keep your engine running smoothly and efficiently. In fact, inadequate air filtration can cause more harm to your engine than poor lubricant filtration. Ineffective filtration can cause serious wear to the engine and its components...leading to low engine power, excessive fuel consumption and ultimately, expensive repairs.

Take advantage of this month's offer, good for your pocket, your engine and operator comfort.

Example used is a 6830 Premium Tractor

Discount options

Fuel, Engine oil, Hydraulic & Transmission filters = 10%

Fuel, Engine oil, Hydraulic & Transmission + Engine Air filters = 12.5%

Fuel, Engine oil, Hydraulic & Transmission + Engine Air + Cab filters = 15%

L155288	Cabrecirculation filter	2	£10.99	£21.98		

Offer Valid from 1st September until 30th September, 2011

Police Alert – Sharp increase in tractor theft

Cesar Datatag - The art of identification

The concept of Datatag is simple - it utilises state of the art identification technologies to permanently mark and protect your property. Datatag makes your vehicles identifiable to the police in such a way that it is virtually impossible for a thief to detect, therefore, the risk involved in stealing your equipment becomes risky, so the criminal tends to avoid stealing it in the first place.

The CESAR Datatag scheme has been tested and approved by the British Insurance test house, Thatcham.

If you would like to reduce the risk of your machinery being stolen and the implications of being without your equipment - then please contact your local service department. Our Datatag Trained Technicians can fit Datatag's to any age, make or model of agricultural equipment from your lawn mower to combine and everything in between.

Please remember as well as piece of mind, many insurance companies offer a discount for customers who have Datatag fitted to their equipment.

Trailer Brake Testing - Stop in time, every time

In a recent survey most farm trailers tested failed to meet basic safety requirements and fell far short of the required efficiency levels. Of the trailers tested, both with hydraulic and air systems, many took longer to stop than they should and in some cases suffered complete loss of control.

Our service department has the expertise and specialist Brake-safe™ meter to test your trailer brakes.

Using this new test equipment, braking efficiency can be measured and allow you for the first time to satisfy yourselves of your braking capabilities and may prevent long term costly brake repairs.

For further information please visit our website and look at the “look behind you” brochure in service publications.

Stay legal, Stay Safe – please call your service department and book your brake test now.
